Mannesmann in 1st Quarter 1999

Earnings up Continued strong growth of Telecommunications Confidence concerning full year

Mannesmann got off to a good start in 1999 thanks, particularly, to the continued strong growth of Telecommunications. Sales were up by 5% to \$5 billion. The marked increase in profits from Telecommunications raised the result of ordinary activities above the level of the previous year.

For the full year 1999 Mannesmann expects Group earnings – including the effects of the acquisition of the fixed-line carrier o.tel.o in Germany and of the majority stake in Omnitel and Infostrada in Italy – to exceed those of 1998. This will result essentially from further improvements in profits from Telecommunications and Engineering.

The continued high growth in Telecommunications (+32%) was primarily responsible for the increase in sales. Automotive added 2%. Engineering very nearly matched the

1998 figure despite the worldwide decline in investments in capital goods.

Telecommunications continues vigorous expansion

Mannesmann Mobilfunk boosted sales by 33% to \$1.2 billion. New customer growth was high, averaging close to 200,000 new customers per month. At the end of March, the company had 6.5 million customers.

In the fixed-line network, Mannesmann Arcor further expanded its leading position among the new competitors. Sales rose by 27% to approx. \$269 million.

In Italy, Omnitel (wireless network) and Infostrada (fixed-line network) continued their successful development. At the end of March, Omnitel topped the 7 million customer mark. Infostrada increased the number of its customers to approx. 1.7 million.

Cegetel, our French affiliate, also showed a very positive development in wireless telecommunications and the fixed-line network business.

In Austria, the Mannesmann company tele.ring has a nationwide network at its disposal following the merger with Citykom Austria.

We will be happy to send you a copy of our Letter to Shareholders together with the 1998 Annual Report on request.
